Eat Well
Spend Less

Top tips, recipes and weekly meal planners
to make your money go further
Foreword

We live in changing times. Prices of commodities are on the rise. Family weekly expense budgets have risen by as much as 37% in recent years. However, the choice of fresh and processed food available to buy has never been as varied and competitively priced as nowadays.

Working as a Community Chef, I am always enthused and inspired to create ideas and recipes that stretch the produce and reduce excess food waste.

This booklet will guide you towards eating healthy, frugal meals that don’t cost the earth. To my mind living a frugal life is about taking care with your money, living on less, making wise decisions, using money saving tips. It is about consuming less, about focusing on the positive things you can do with the money you have, making new dishes for your family, ‘mixing it up’ a little, trying new recipes or versions of well loved healthy family favourites, buying seasonal meats, fruit and veg.

Cornwall has been the home of healthy frugal suppers since time began. Evolving from mighty Pasties, Muggety pies and Kiddley broths, we have come a long way in demonstrating the power of innovative and smart meal solutions. Leave the processed food and ready-made meals on the supermarket shelves. Get your thinking caps on and start eating healthy frugal feasts.

Need some ideas to make your money go further?

We have designed a one week planner for a family of 4 and a one week planner for a single person to help you.

The recipes are all budgeted based on average supermarket costs. You should be able to make even more savings if you shop around. A costed shopping list can be found at the back of this booklet.

The week planners offer a balanced diet which means your body should get all the nutrients it needs. Portion sizes are based on average requirements. Some people may need more or less.

We have also included recipes shared by Cornish community groups, including Food Banks.

Hopefully we’ve managed to show that healthy eating doesn’t have to be expensive. Enjoy the recipes and for more ideas please log on to our website: www.cornwallhealthyweight.org.uk

**Ingredients**
- To make the multi mince:
  - 1 teaspoon vegetable oil
  - 1 teaspoon thyme
  - 1kg minced beef or turkey / Quorn if veggie
  - 2 onions, diced
  - 2 garlic cloves, finely chopped
  - 1 large carrot, finely chopped
  - 600ml low salt beef stock / vegetable stock

**Method**
1. Heat the oil in a non-stick frying pan. When hot, add the mince and fry for 10 minutes until brown, breaking up any lumps.
2. Spoon the mince onto a plate, and pour away the excess fat.
3. Add the oil to the pan and soften the garlic and onion. Then add the carrots and soften. This will take about 10 minutes. Return the mince to the pan then pour on the stock and thyme.
4. Bring to the boil and simmer for 30 minutes until the mince is tender and the sauce has reduced down.
5. Split the mixture in half; put half to one side to make the chilli, and put the other half in a container to freeze. Cool the half to be frozen within 1-2 hours, to prevent bacteria growing, and then store in the freezer.

**To make the chilli:**

**Method**
1. Add the multi mince, tin of tomatoes, mushrooms, tomato puree, chopped peppers and spices into a pan. Give it a good stir.
2. Bring to the boil and simmer for 20 minutes, stirring occasionally to make sure the sauce does not catch on the bottom of the pan.
3. Whilst this is cooking, cook the rice. Rinse the rice in a sieve, then tip into a saucepan with double the amount of water. Bring to the boil, then turn the heat all the way down and cook on the lowest possible heat for 10-15 mins. Cover the pan tightly with a lid.
4. Use a fork to fluff up the cooked rice.
5. Drain and rinse the beans in a sieve and stir them into the chilli mince. Bring to the boil again and bubble for another 10 minutes, adding more water if it looks too dry.

Jacket Potato with baked beans

Method
1. Choose large, even sized potatoes with as few blemishes as possible. One potato per person. Scrub the potatoes under the tap and then dry them well. Prick all over with a fork.
2. Pre-heat the oven to 200 C (gas 6). Put the prepared potatoes into the oven directly onto the shelf and cook for about one and a half hours. If the potatoes are done they will ‘give’ slightly when you squeeze them.
3. Put the beans in a pan and heat on the hob for 5 mins.

You can reduce the cooking time (and thus the cost of the fuel to heat the oven) in two ways:
(a) If you push a metal skewer through each potato it helps to conduct the heat to the middle of the potato and cuts the cooking time to about 3/4 hour. Do not use metal skewers in the microwave to cook.

(b) If you pre-cook the potatoes for 2 or 3 minutes (each) on high in the microwave before you put them in the oven this will reduce the cooking time to about 1/2 hour.

You can also cook jacket potatoes entirely in the microwave, which takes about 6 minutes. This is very quick but will not give a nice crispy skin like the oven does!

Remember to make up the fruity jelly as per the instructions on the pack, so that it will have time to set for the evening.

Try with a sprinkle of cinnamon

If you want the fruit uncooked, defrost overnight

Grating cheese makes it go further than slicing.

Coleslaw with low fat dressing

Method
1. Make the dressing first. Squeeze the juice out of the lemon and put in the bottom of a large bowl. Make sure you don’t add any pips!
2. Add the yogurt and the mayonnaise and mix well. Taste and add salt and/or pepper if liked (but you probably won’t need either).
3. Now cut any dirty leaves off the outside of the cabbage, then cut out the hard ‘core’ of the cabbage and cut the half into two. Then, using a very sharp knife shred (slice) the cabbage as fine as you can, putting the shredded cabbage into the bowl with the dressing as you work. Peel the onion if using, slice very finely and add to the bowl. Next wash and peel the carrots and then grate them into the bowl as well. If you are using the apple grate that and add it now (no need to peel but remove the core), stirring it in quickly to stop it turning brown. Add the raisins or sultanas if using. Check seasoning and serve.

Ingredients

½ hard white cabbage
2 large carrots
½ red onion (optional)
½ a small pot low fat plain yogurt
1 lemon (or juice from a bottle)
⅓ to ½ small jar reduced fat mayonnaise
A few raisins or sultanas or 1 eating apple

Family health tips

1. Getting off to a ‘Healthy Start’ - are you expecting a baby or do you have children under 4? You may be eligible for extra money to spend on healthy foods and also free vitamins. You can ask any Midwife or Health Visitor about the ‘Healthy Start’ scheme or pick up a form at the Food Bank.

2. Remember - the best food for babies is breast milk - free, safe and convenient. Most babies don’t need anything other than mum’s milk for the first six months and continuing to breastfeed after this is good for the health of mum and baby. Solid foods should be introduced when baby is around six months old - ask your Health Visitor for advice.

3. Kids should enjoy 60 minutes of activity on top of their school day. It’s more fun if you make activity something the whole family can do together, and kids are more likely to join in if they see mum or dad doing it too.

4. To help children have healthy teeth and a healthy weight try switching from sugary drinks to water, semi-skimmed or skimmed milk or to diluted fresh fruit juice. Switch from snacks like sweets and biscuits to fresh, dried or tinned fruit (in juice), breadsticks or unsalted nuts. Instead of sugary cereals try reduced sugar cereals, fruit or toast.

5. Try to have three regular meals a day, this will help you from feeling hungry between meals and stop you from having too many snacks. Eat as a family, whenever you can, to enjoy your meals together and to try out these healthy recipes together. When we see people eating lots of healthy foods we tend to follow suit. Make sure you have breakfast. It gives you a kick start to the day.

6. Me sized meals - Remember that children are smaller than adults and have smaller stomachs, therefore they need less food. It is also healthier to give smaller portions and then let children ask for more if they are still hungry. Be careful of packet sizes. Lots of foods and drinks, like tins and bottles of fizzy drinks are designed for adults or for sharing. Try using a smaller plate so that it looks nice and full when your dinner is on it.

7. Try and swap one unhealthy snack for one healthy snack every day. Aim for five portions of fruit and vegetables a day; tinned and frozen can be just as good as fresh. Cut down on snack foods as they are often jam-packed with fat. Try and keep foods like crisps, buns, cakes, pastries and biscuits as occasional treats. Grilling, baking or poaching food rather than frying it can reduce the fat content by as much as two-thirds.

8. Get up and about. Walking is free and good for your physical and mental health. Aim to have less time on the sofa.

Tips for older people

Whatever your age it is still important to get the right balance of a variety of foods. Check out the Eatwell Plate on page 7 for further information on how to get the balance right.

As you get older try to:

Eat plenty of foods containing starch and fibre to help prevent constipation and digestive problems, these include wholegrain or brown types of starchy foods such as bread, rice, pasta and breakfast cereals. Other good sources of fibre are potatoes, oats, beans, peas, lentils, fruit and vegetables.

Eat calcium rich foods to help you avoid osteoporosis (brittle bones). Good sources include dairy products such as milk, cheese and yogurt. Calcium is also found in tinned fish with bones such as sardines, green leafy vegetables such as broccoli and cabbage (but not spinach), soya beans and tofu.

If you don’t eat as much as you used to, eat smaller meals more often and supplement them with nutritious snacks, such as full cream dairy foods like yogurt and cheese.

Eat regularly, at least three times a day. If you don’t feel like cooking from scratch, have a tinned, chilled or frozen ready-prepared meal instead. It’s a good idea to have a store of foods in the freezer and cupboard in case you cannot go out.
Money saving tips

- It is often cheaper to buy at the deli counter than to buy pre-packed food.
- Shop at the end of the day – the food may be reduced in price.
- If you don’t use all your fresh vegetables either make soup, fruit smoothies or freeze for future use.
- Buy in bulk or shop with a friend and take advantage of buy one get one free offers.
- Use quality meat and bulk it up with pulses or pasta.
- Buying seasonal fruit and vegetables is likely to be cheaper.
- Using tinned and frozen fruit and vegetables can cut down on waste.
- Buy locally as travel costs, etc., should be taken into account.
- Look out for special offers.
- Grow your own fruit, vegetables and herbs could save you money.

Handy hints

Pasta is quick to cook and if you do too much you can turn it into a salad and eat it cold.

Keep a supply of tinned vegetables in the cupboard such as peas and sweetcorn which are a good source of fibre. Tinned fruit in natural juice is useful too as a tasty and low fat dessert.

Add vegetables such as potatoes, carrots, onions, peas and pulses to soups and casseroles which add extra flavour, vitamins and fibre, makes food go further and adds to your 5 A DAY (not including potatoes).

Dry fry without additional fat and skim off any fat that comes to the surface of casseroles and stews.

Always store vegetables in a cool dry place. Cook vegetables in a small amount of water with the lid on the pan for minimum cooking time or steam them. This saves the vitamins and your fuel bill.

Don’t pour oil straight into the pan. Measure it out on a spoon to avoid using too much, or use an oil spray.

Try stir frying as it’s quick and economical.

When using the oven make sure it is full to make the most of the heat. You can always use jacket potatoes for a meal the next day.

Never shop when you are hungry. Plan your meals for the week, before you go shopping. Make a shopping list and stick to it.

Remember that frozen and tinned fruit and vegetables are often cheaper, easier to store and are still full of nutrients.

| **Drain** | To pour off the cooking water from vegetables, pasta etc. |
| **Fry** | To cook in hot fat. To cook in a small amount of fat is called shallow frying. To cook in a deep pan of fat is called deep fat frying. Dry frying uses very little or no fat to cook food in order to cut down on the amount of fat in the finished dish. |

| **Rub in** | To mix butter or spread into flour using the fingertips until the mixture looks like fine breadcrumbs. |
| **Season** | To add salt (sparingly), pepper, herbs etc., to a recipe to improve the finished flavour. |
| **Shred** | To cut into very thin strips e.g. cabbage. |
| **Sift** | To put ingredients through a sieve, e.g. flour. |
| **Simmer** | To keep liquid just at boiling point so that small bubbles can be seen. |
| **Stir fry** | To cook small pieces of food in a wok or frying pan over a high heat, using very little fat. The food is constantly stirred to make sure it cooks evenly. |
| **Whisk** | To use a balloon, rotary or electric whisk to beat egg whites, cream, etc. until the mixture forms peaks when the whisk is removed. |
| **Zest** | To finely grate a citrus fruit e.g. lemon, removing just the coloured part of the skin and not the bitter white inner part. |
